Improved security with our pre-auth option for credit cards

Announcing our new mini kiosk

It holds 16 room keys or cards, available as an all-inclusive, low-cost monthly rental plan, which includes full maintenance and ongoing upgrades. Allows guests to create or complete an on-line check-in, in less than two minutes...

This is how it works:

1. Customer chooses a room
2. Enters their details
3. Customer can order other services eg breakfast, internet ...
4. Pay by credit card which is authorised on line
5. A tax invoice is emailed to the customer
6. They collect their room card or key

- Green , paper saver - no printer required, receipts are emailed only

Check Inn Systems is an Australian owned and operated Engineering Company. Over the past 12 years we have designed and manufactured various unique access control solutions for the accommodation industry.

Our Self Check-in Kiosk has been designed to save you money and give your life back. Guests can now safely check in to their accommodation 24/7 without the assistance of any staff. This is particularly convenient for late night check-ins.
